

JACLaS (Japanese Association of Clinical Laboratory Systems) EXPO 2017

(Yokohama, 21st -23nd September, 2017)

Veritas exhibited at JACLaS Expo held in Yokohama, September 21-23, 2017. This Expo is the largest exhibition which displays the newest diagnostic instruments and reagents in Japan. Our purpose is to promote raw materials such as Ag, Ab, serum.... etc to IVD manufactures. This was a great opportunity for us to introduce raw material suppliers to Japanese IVD companies. Over 8,000 people attended this EXPO. During the expo, we met many existing and prospect customers, and had meaningful meetings. VERITAS works as a distributor to many of the diagnostics kit manufacturers and pharmaceutical research laboratories in Japan to import bulk products based on their requirements. We introduced following suppliers this year. We also held a seminar to some of our IVD manufacturer and more than 20 people got together to communicate with us and shared opinions on topic related on the CE regulation.
